About this Report

The Time Category

This is the first overseas social responsibility report published by CETC. The content in this report mainly came up in the latest three years. Part of the presentation and data can be dated back to some previous years.

Organizational Scope

The organizational scope includes China Electronics Technology Group Corporation, Second-class agencies as well as overseas institutions. For easy presentation, China Electronics Technology Group Corporation will be presented as CETC or Group Corporation.

Basis of Compilation

This report is written on the basis of SASAC's "Guidelines to the State-owned Enterprises Directly under the Central Government on Fulfilling Corporate Social Responsibilities" and also refers to the "China corporate social responsibility report writing guide 2" from corporate social responsibility research center of Chinese Academy of Social Sciences as well as social responsibility work promoting requirements of CETC.

Compilation Department

This report is sponsored by China Electronics Technology Group Corporation and CETC International Co., Ltd., the wholly owned subsidiary of CETC, has undertaken the written work. CETC International Co., Ltd. is the main channel for CETC to carry out its international business. It is also CETC's social responsibility demonstration base.

Our Overseas Duty

As the leader in the field of electronics and information system integration in China, CETC insists on rooting the concept of social responsibility in the enterprise management and the overseas development strategy, commits itself to sharing China's reform and opening achievements with overseas parties, and to share the achievement and experience in the electronics and information field. With strong scientific research strength, advanced information technology and high quality professional services, CETC actively carries out financial responsibility, environment responsibility and social responsibility worldwide. It values peaceful, cooperative and win-win development among enterprises all over the world. CETC develops with all the countries in the world. Furthermore, CETC pools its strength to promote the progress of science and technology, the ecological civilization and to improve people's livelihood so as to create a living environment of peace, wisdom and harmony.

Leadership Message

Serve as a link between past and future to create the world leading enterprise with science and technology.

Carry on proud traditions and open up a way to take responsibility harmoniously.

As both the leader in the field of electronics and information system integration in China and the main force in the construction of national economy informatization, CETC, in possession of the strong electronic science and technology innovation resources accumulated since the founding of the People's Republic of China, has played a backbone role in its involvement in China's reform and opening-up. During the great leap forward development of nearly ten years, as a CSOE, CETC has served the party and the nation by actively implementing the "going out" strategy and share its electronic information technology innovation and the achievements with all other countries in the world. CETC implements social responsibility in all countries where its business is done. It is committed to set an example in legal and honest business operation, resource-conservation and environment protection. CETC is also devoted to be the model in building people-oriented and harmonious enterprise, and establish a "responsible" image of corporate citizenship.

CETC has always been taking the maintenance of world peace as a core responsibility. Both the stable international order and people's health and welfare depend on a peaceful environment. CETC keeps promoting independent innovation and technological advancement, especially making new breakthroughs in key technologies of the industry. CETC is to make its main business, the anti-terrorist electronic to be bigger and stronger by obtaining new breakthroughs in the development of electronic technology, equipment information construction as well as non-traditional security defense. Devoted itself to share its anti-terrorist information technology achievements with other countries, CETC is improving the level of intelligence, informatization continuously and precision by technical exchange, training program and joint research and development.

CETC always deems promoting social informatization as the financial responsibility. It exploits science and technology to promote harmonious use of space, to enhance urban informatization and to deal with emergency rescue and disaster relief. As the old Chinese saying goes: It is better to teach a man how to fish than just giving them fish. In doing so, CETC has built a full range of agriculture information system in Burma so as to help the country move up to an agricultural informatization and modernization step. In Pakistan, CETC has deepened the traditional friendship between China and Pakistan by building an electronic industry system covering electronic industry and information technology as well as a modern science and technology system.

CETC always views environment protecting, green and low-carbon, sustainable development as the responsibility of the times. When in other countries, CETC places emphasis on protecting the local ecosystem. From R&D, production,

testing, certification to service, CETC has taken advantage of the technology edge to push forward the construction of new energy industry chain of the world so as to develop energy-conserving products and improve resource utilization efficiency, and to reduce the consumption of non-renewable resources and lead environmental technology development to protect the earth.

CETC always reckons human-oriented science and technology, charity utility and creating a harmonious global village as the social responsibility. CETC has not only actively integrated into the local community but also pays close attention to education, culture, health, etc. By international cultural exchange, disaster relief effort, poverty alleviation and improving people's livelihood, CETC has promoted harmonious developing concept to let "Chinese Dream" to be known by the world and makes the "world's Dream" come true through mutual prosperity and development.

As an old saying goes, "Riding the wind, I set my sail; Ploughing the waves, I cross my sea; Longing for a bright future, I go to my dream." During the "Twelfth Five Year Plan" period, the core objective of the central enterprise reform and development is that the central enterprises should grow stronger and better to cultivate a world-class enterprise with international competitiveness. Advanced and unique corporate culture and forceful social responsibility is one of the 13 key elements of a world class enterprise. CETC has also made its medium and long-term goal. By the end of the "Twelfth Five Year Plan" period, CETC, with great independent innovation and an international famous brand, will become a domestically prominent and leading enterprise in the world with military products as its key products while high-tech civilian industries as the pillar. Therefore, with the strong support and cordial help, CETC will take advantage of the role of bridge and link for foreign cooperation to combine enterprise development with social responsibility. CETC will regard the social responsibility as one of the enterprise development strategies to push the enterprise social responsibility work. CETC will firmly achieve the combination of sustainable development of the enterprise itself, the society and the environment. It will actively implement corporate social responsibility with more enthusiasm, more effective action and higher sense of mission.

Under the guidance of enterprise development strategy, CETC will feature the overseas social responsibility practice by relying on its own advantage to push the global electronic information technology great-leap-forward development, thus to improve the informatization level and people's happiness index. By effective implementation of the environment protection concept, CETC will focus on building up a resource conservation and environmentally friendly enterprise to arouse the awareness of environmental protection and resource conservation throughout the world. Meanwhile, CETC will grow into responsible corporate citizenship by launching major social public welfare projects to broadcast the concept of harmonious development and harmonious world all over the world.

About Us

Company Profile

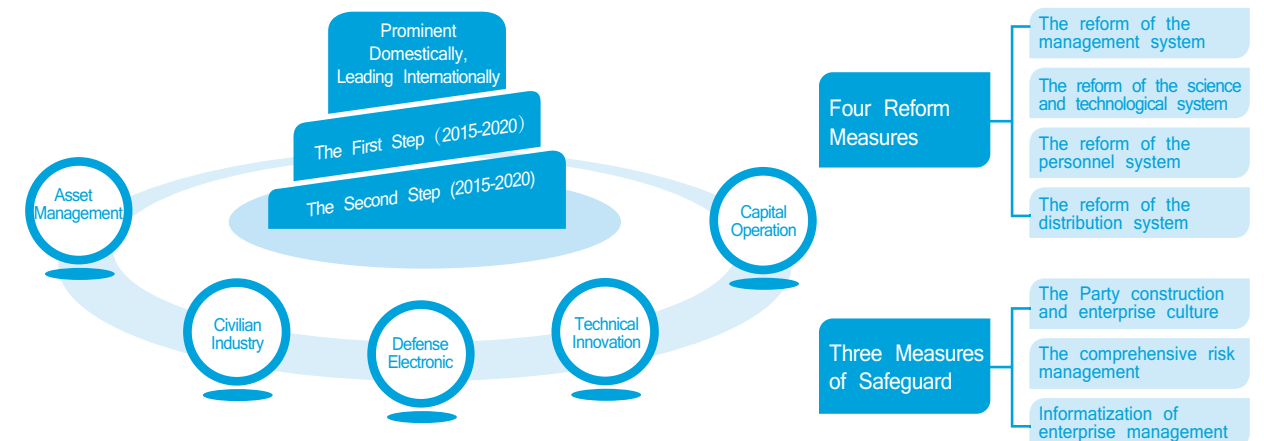

China Electronics Technology Group Corporation called CETC was founded on March 1st, 2002. CETC is a key state-owned enterprise composed by the electronic information science research institutes and hi-tech enterprises which had been founded since the founding of P.R. China in 1949. CETC is also a state-owned and authorized assets investment agency approved by the Chinese government. It is mainly engaged in military and civilian large-scale electronic information system construction, major equipment, communications and electronics, development and production of software and components. CETC also provides high-end certification and testing and evaluation service.

With a global thinking perspective, CETC actively implements the "going out" strategy on the construction of global economy, space utilization and environmental protection. The business of CETC spreads over 100 countries and regions. By promoting economy construction, social development and environmental governance in its business areas, CETC has implemented overseas social responsibility and received widespread praise.

Business Framework

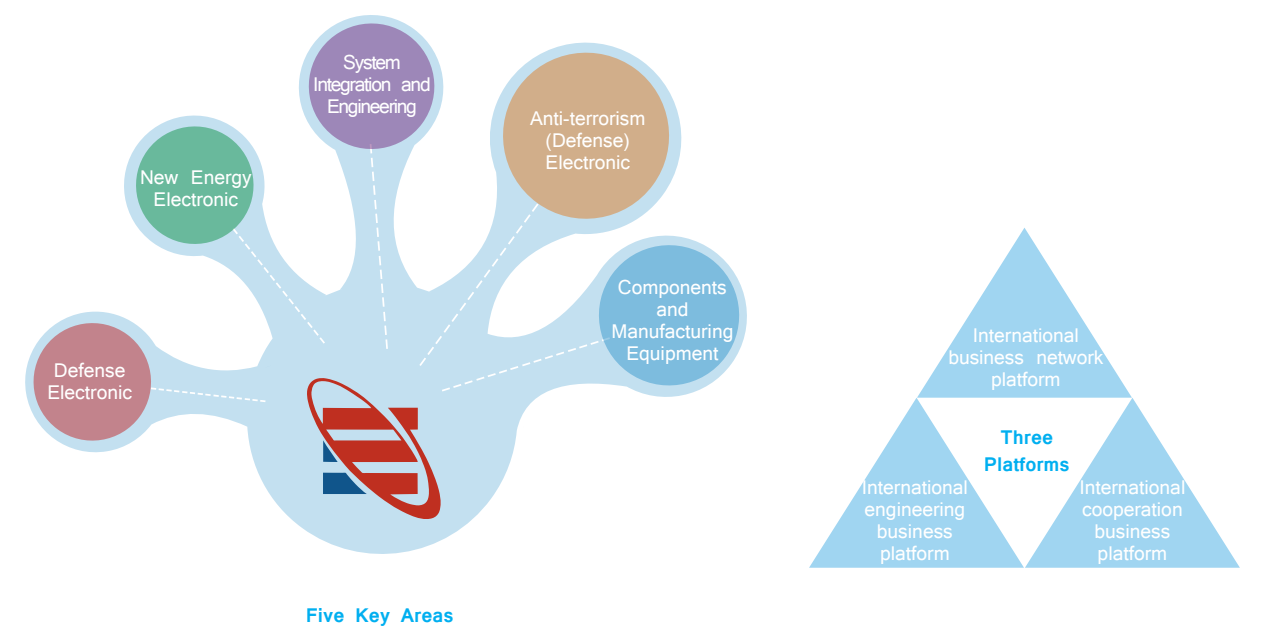

■ Group

In order to realize the sustainable development and improve global development ability, CETC has put forward the general idea of long-term reform and development.

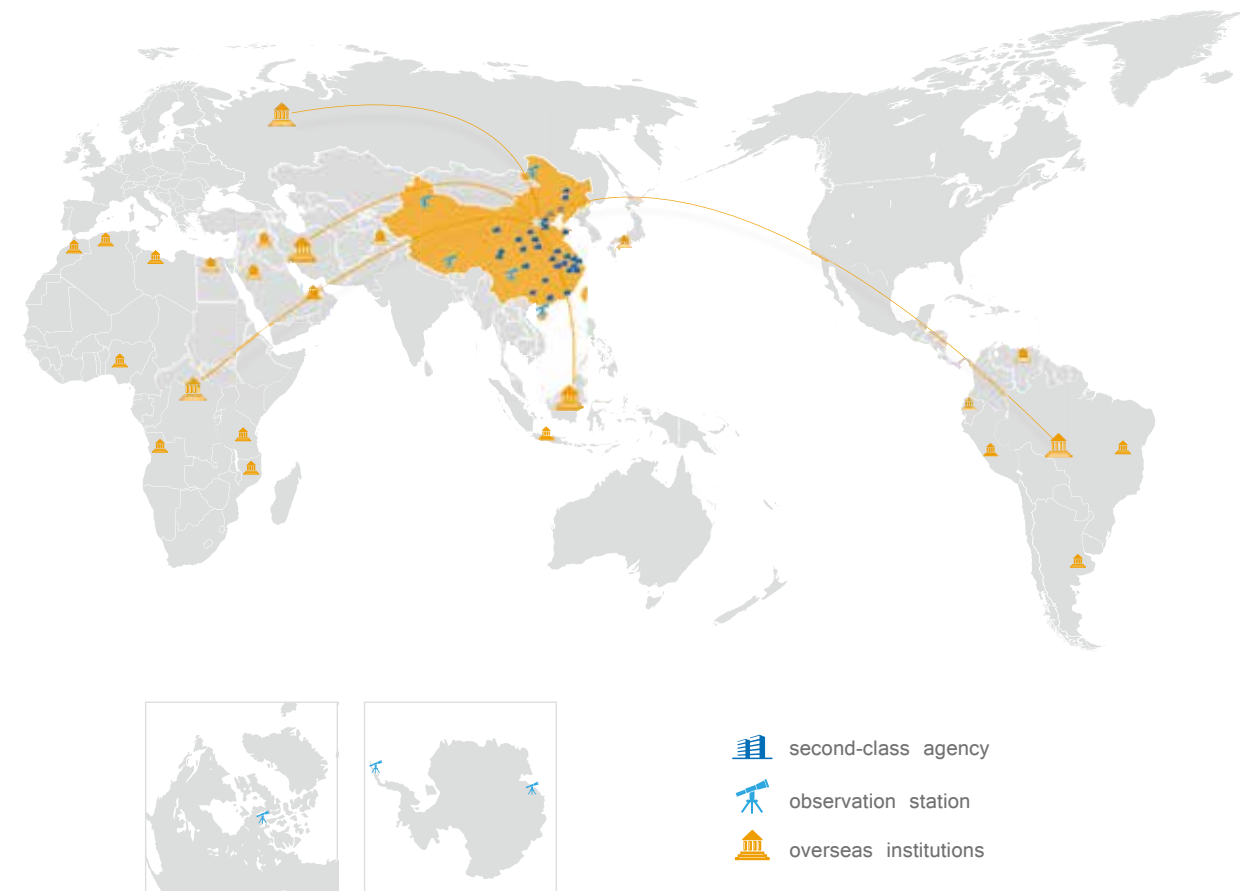

■ Overseas

By carrying out diversified development pattern, CETC has brought forth new ideas to the "going out" strategy. By building the "Three Platforms" and "Five Key Areas" strategies, CETC has promoted the benign development between each platforms and areas.

Market Distribution

The business of CETC has spread over more than 100 countries and regions. There are 8 overseas branches in Japan, Sweden, the USA, Russia, etc and more than 40 overseas institutions covering international trade, informatization and new energy.

The business has spread over more than 100 countries and regions

100

There are 8 overseas branches.

8

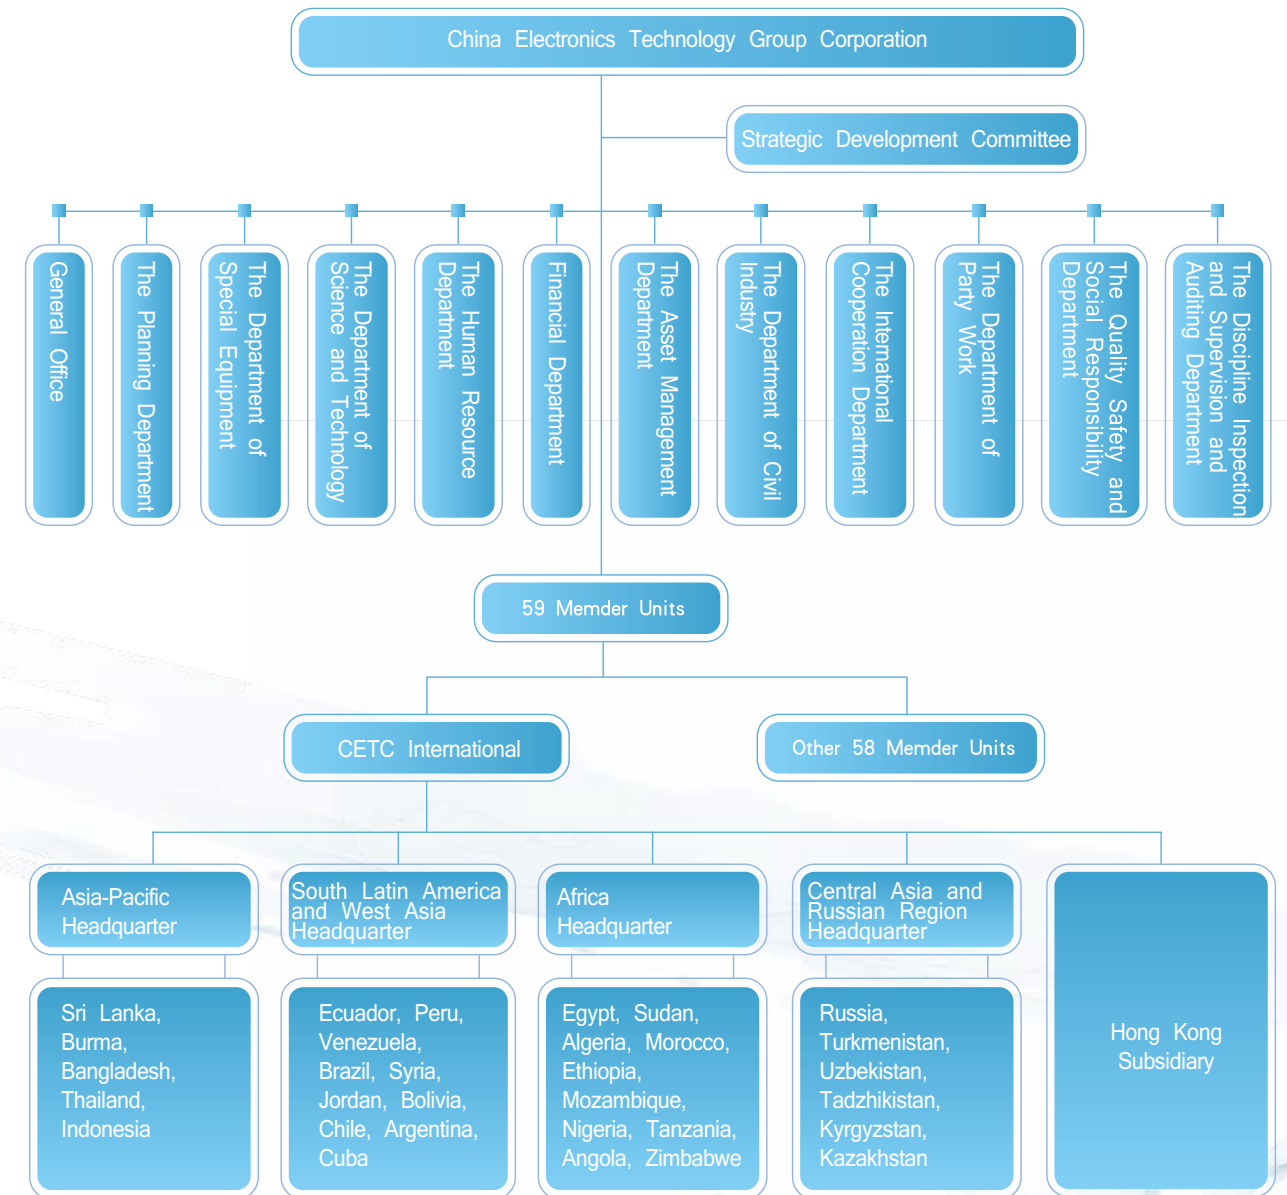

More than 40 overseas institutions have been established.

40

Organizational Structure

CETC has built an international structure including group headquarter international business platform, members of the unit and overseas offices to ensure the implementation quality of "going out" strategy and social responsibility.

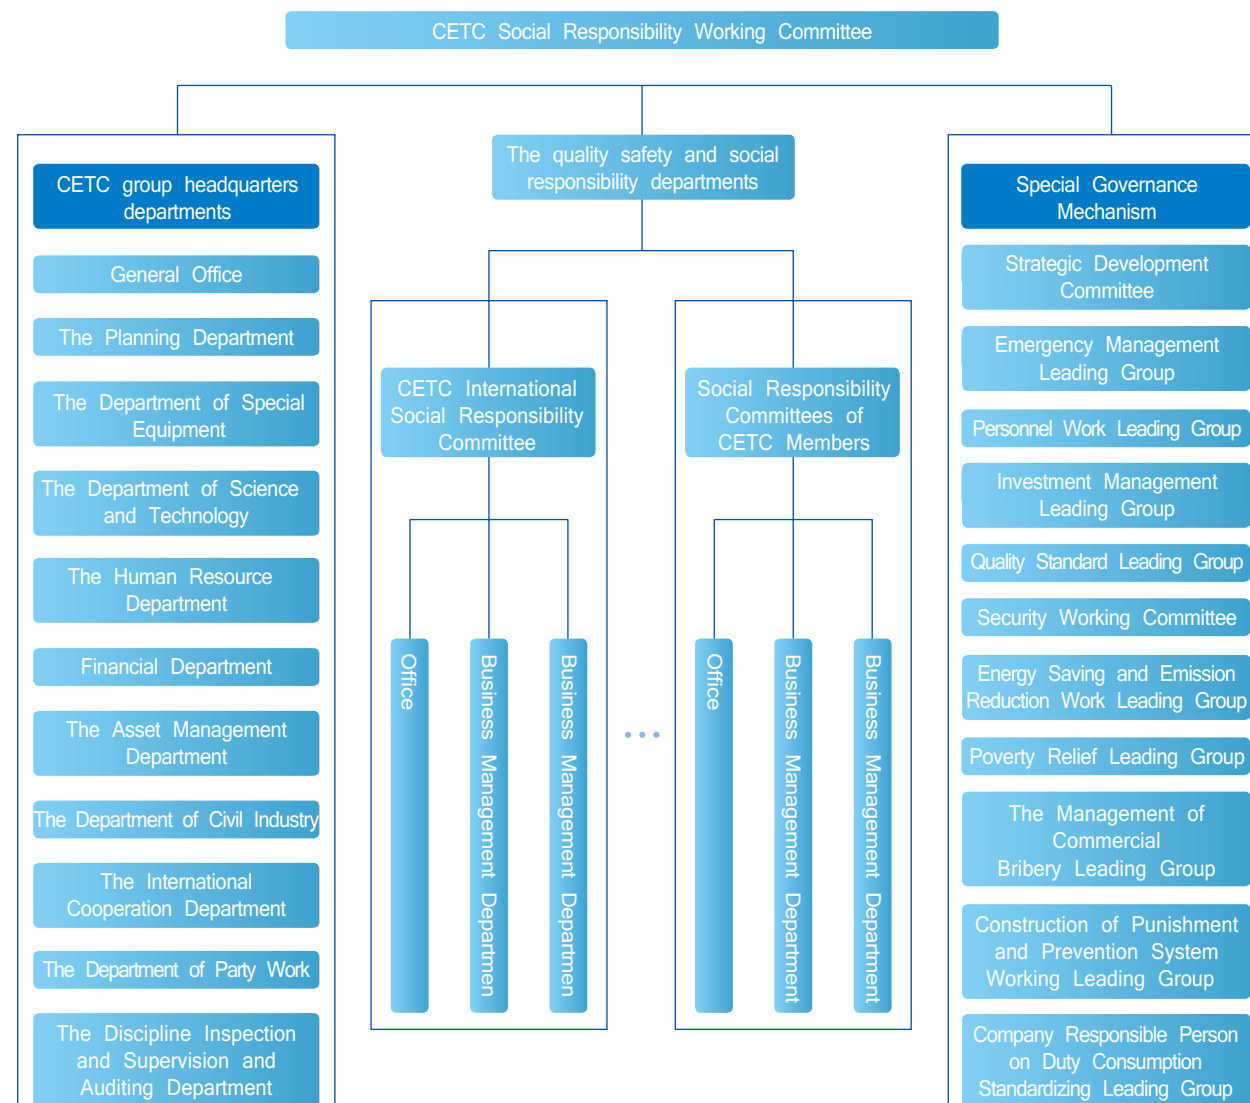

RESPONSIBILITY STRATEGY AND MANAGEMENT

CETC has fully integrated the social responsibility concept into the international development planning. CETC takes technical innovation as the core competency to take part in the local social development, economic development and environment protection. By its technological superiority and innovation service, CETC is committed to push the application and innovation in information technology in space utilization, anti-terrorism and environment protection so as to build win-win business. Also CETC is committed to become a reliable cooperative partner and corporate citizenship to realize the sustainable development of enterprise, social, economy and environment.

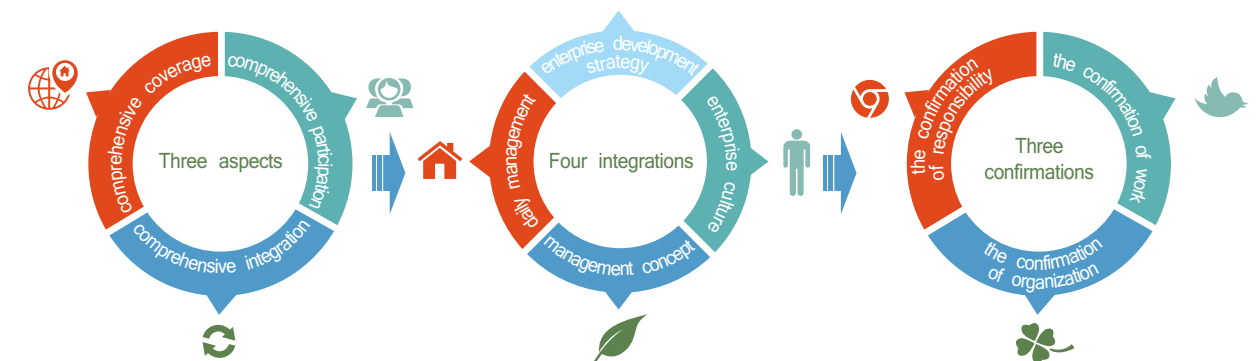

The Governance of Responsibility

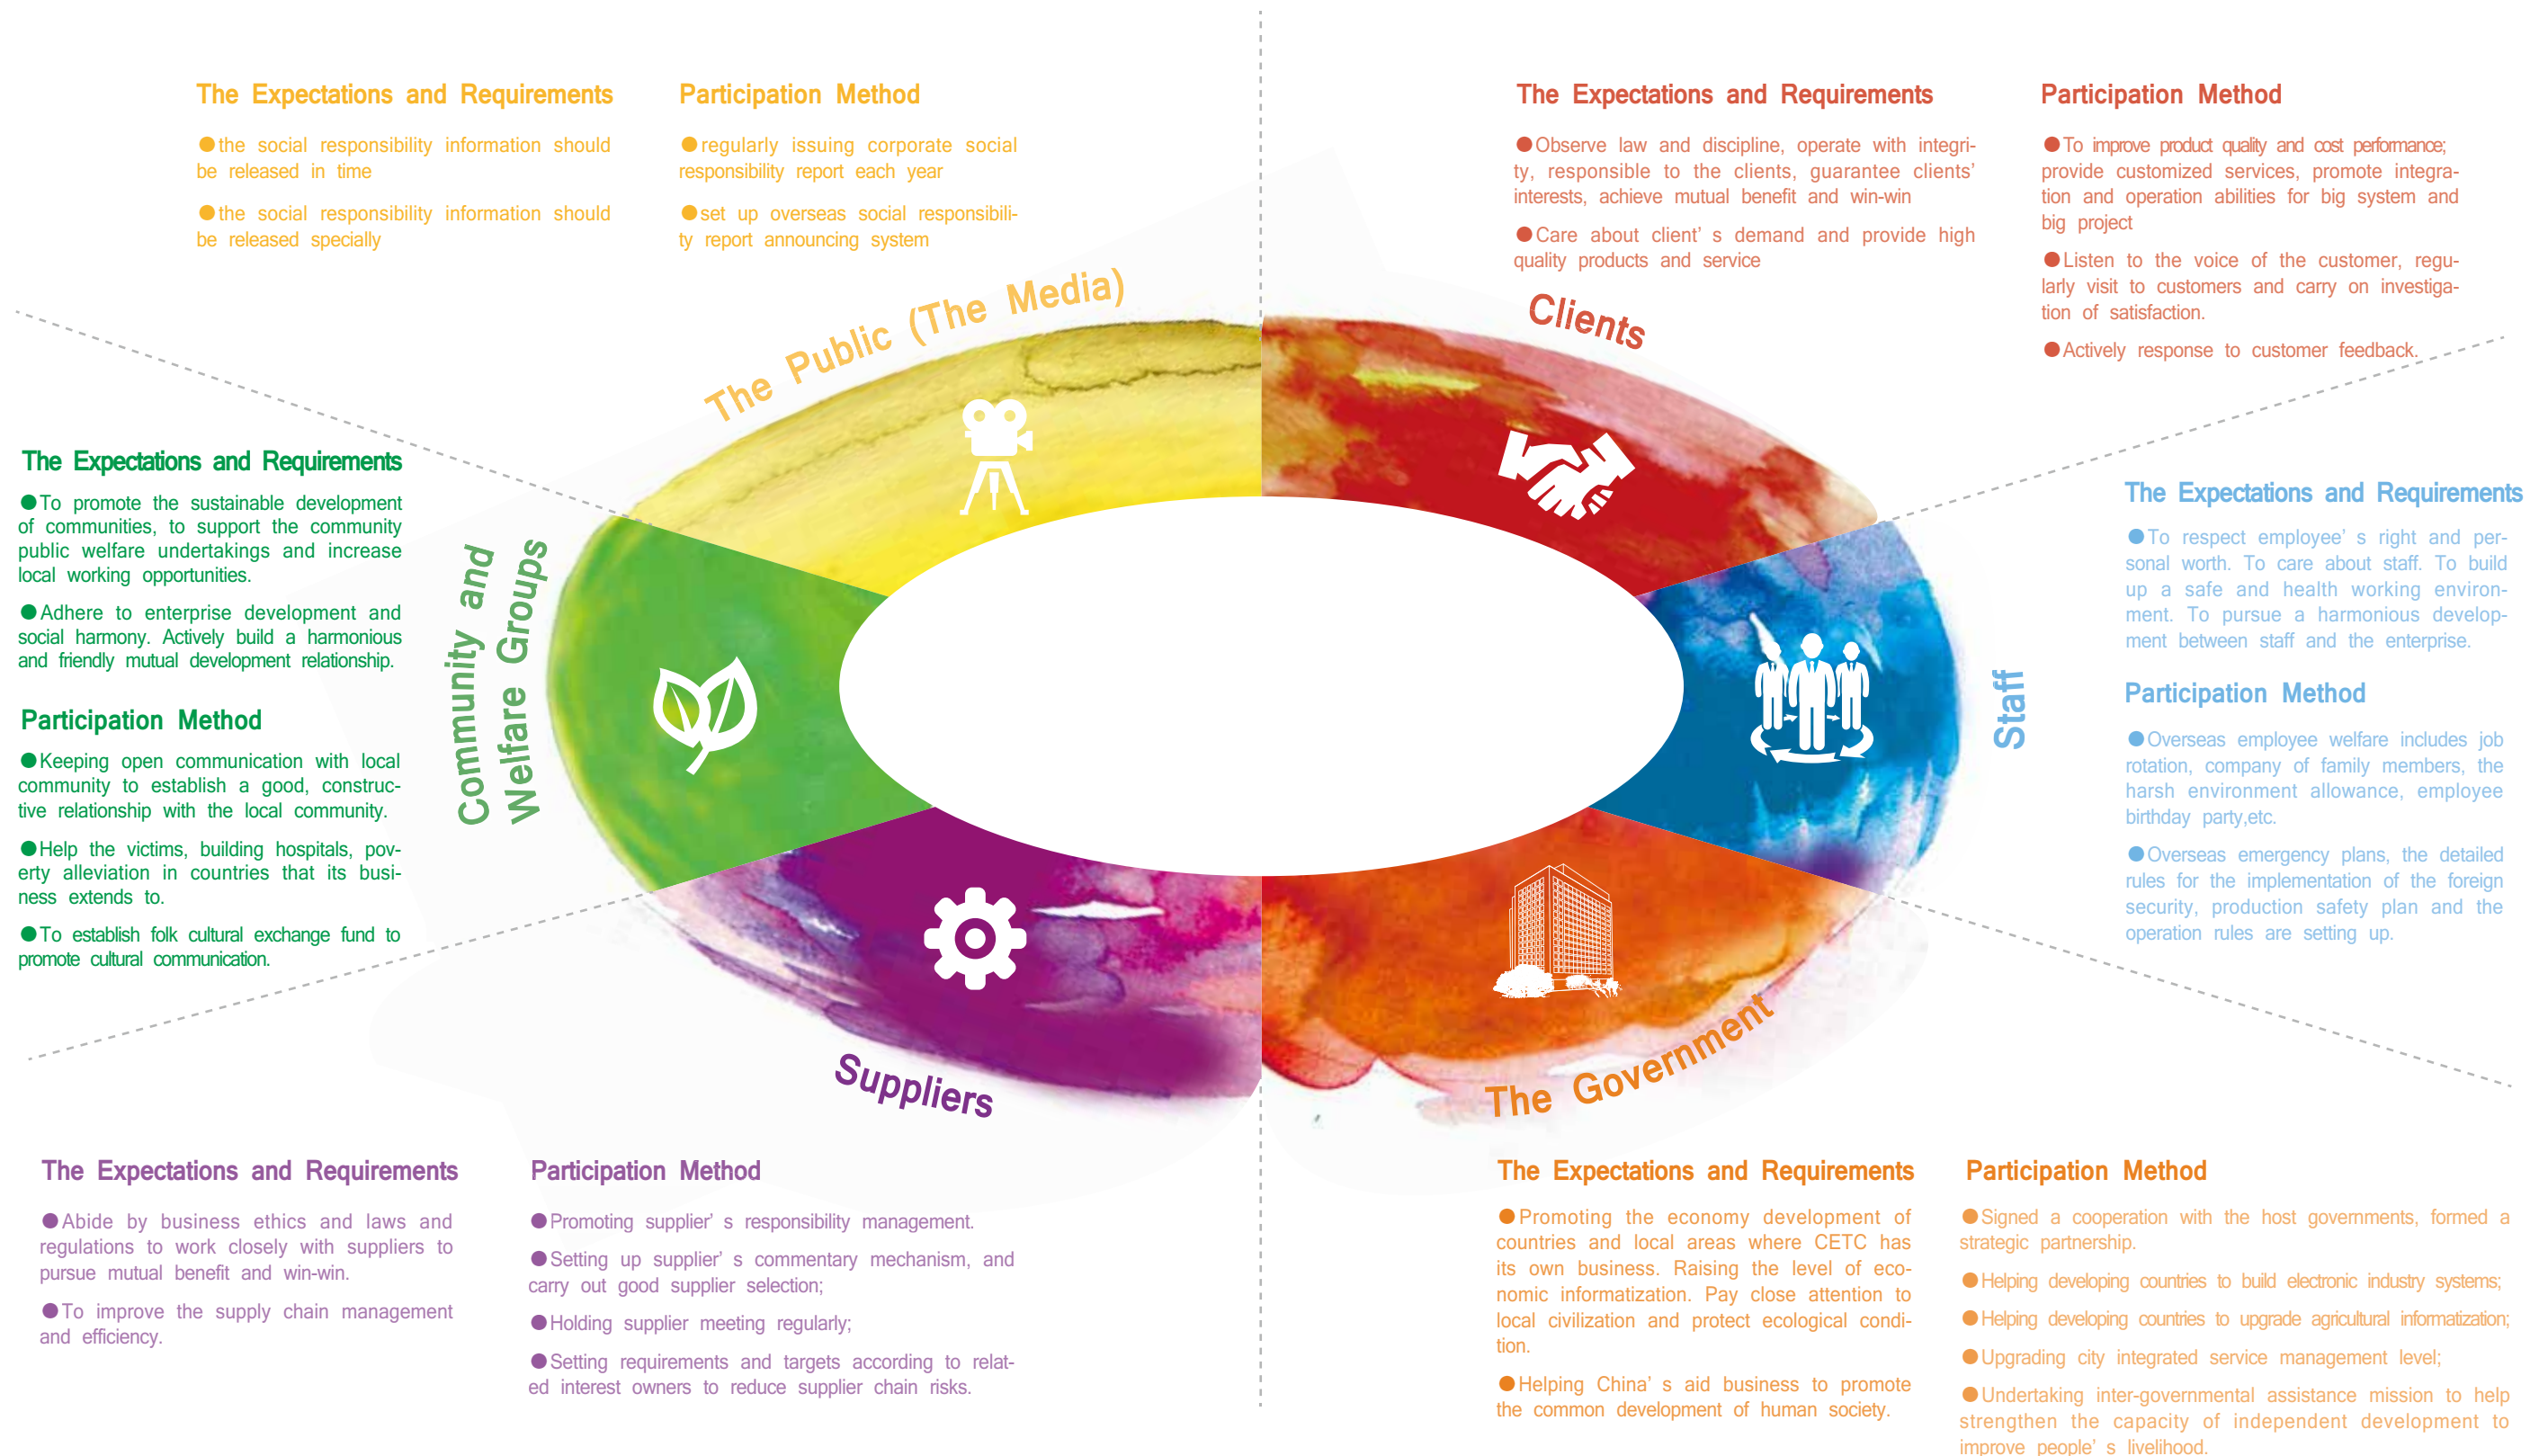

CETC has built a “Group headquarters- The quality safety and social responsibility department-members of the agency” three classes social responsibility organizational system. In overseas CETC has built a social responsibility management system and a overseas social responsibility management structure. The long-term mechanism of social responsibility has also been set up so that the social responsibility work of the whole group can be unified organized and effectively managed.

CETC has emphasized the sustainable development between social responsibility and its own business. For this purpose, CETC has come up with a social responsibility management structure of “three aspects”, “four integrations”, “three confirmations”, which has been running through the cotation decision, culture and daily management.

Stabilization

STABILIZATION, PEACE 7T JS.-ZJHUJ (WORDBOOK)

PEACE, SECURITY AND DEVELOPMENT

Peace, like air and sunlight, unnoticeable but beneficial, is the eternal pursuit of human beings. But with the profound changes and transformation in international politics, economics and society, the peace of the world is still threatened by various instability factors of terrorism, regional conflicts and other disrupts. China is always following the path of peaceful development and cooperating with other countries for a world of peace, stability, integrity, harmony and vitality.

CETC, China Electronics Technology Group Corporation, dedicates itself to a harmonious world of sustainable peace and common prosperity. It is ready to support the Global Counter-Terrorism with its state-of-art technology in anti-terrorism, homeland security through technology aid, capability export so as to transfer the positive energy of peace and to bring the world with fresh air and warmth.

CETC tailor-made anti-terrorism information system for international customers

Stabilization • Anti-terrorism

With the superiority in electronic information technology, CETC practices the ideas of comprehensive security, common security and cooperative security in an aim to raise the intelligence, information technology and precision of anti-terrorism.

Capacity Construction

■ Building of anti-terrorism information system

CETC helps many countries with building anti-terrorism information system integratedly from command and control, communication and computer and improving detection and response to terrorist attacks and other emergencies.

Video surveillance products of CETC applied to border areas in many countries

■ Improve early warning and detection capabilities

By virtue of the long-term research experience and technology superiority, CETC helps its customers with building defense early-warning system and closely track the technology trends in the field of early-warning and detection, as well as enhancing capabilities in anti-terrorism and early-warning.

CETC provides various kinds of early-warning products to meet the needs of anti-terrorism

Strengthen the ability to customize communication solution

To meet the needs of communication in complicated environment for anti-terrorism information construction, CETC innovates and develops the abilities of tailor-made, large-scale projects and system as well as assists its customers in customizing communication network so as to contribute to anti-terrorism.

Diagram of integrated air and space defense communication network designed by CETC

CETC provides a variety of mature products and solutions for international anti-terrorism

Technical Cooperation

Build platforms for technical exchange of anti-terrorism

CETC is committed to promoting the development of anti-terrorism all over the world and expand the application of electronic anti-terrorism information technology. By means of seminars, trade cooperation and exchange on exhibitions etc, we endeavor to help every country master the advanced anti-terrorism technology and to enhance the overall strength of anti-terrorism.

Leaders of CETC attended an foreign affairs activity

Leaders of CETC met with Defense Minister of Thailand

Leaders of CETC and Minister of Sports Brazil discussed Olympic security

Leaders of CETC and the Planning Department of Bolivia exchanged views

Promote technical cooperation against terrorism

Through ability export, trade cooperation and technology transfer etc, CETC exchanges and cooperates with government agencies of many countries in many fields so as to contribute to international anti-terrorism.

- 1.CETC hosted the 24th International terrorism and Police Equipment Technology Exhibition
- 2.CETC discussed anti-terrorism with Egyptian officials
- 3.CETC introduced anti-terrorism solutions to U.A.E. officials
- 4.The star security products of CETC demonstrated in an international exhibition
- 5.An VIP delegation of ten countries from Latin America visited CETC
- 6.The senior delegation of Congo carried out exchange activities with CETC

Stabilization • Security

With the technological edge and successful experience in frequently serving top events at home and abroad, CETC actively joins the security construction all over the world and improves the intelligence and information of urban security so as to facilitate people living and working in peace and contentment.

Safe City

CETC is devoted to construction of overseas safe cities. The sound technical support system of public security management is built based on modern information and communication technology to realize the daily monitoring and prevention of potential risks and improving the city's overall contingency service and speed of response, as well as guarding the lifeline for urban security.

In Argentina

CETC constructed the "Safe City" project in Magdalena in Argentina. After the implementation, the vandalism, theft and violence significantly reduced in this city and the government's response and management of emergencies had also been improved.

The "Safe City" project tailor made for Argentina by CETC guarantees the safety for over hundreds of thousands residents

In Brazil

CETC provides the most advanced video surveillance solution to effectively curb the smuggling ,drug and other illegal activities within the country.

Public Security

CETC possesses great capabilities in security monitoring and traffic management and so on. It had made outstanding contributions for the success of 2008 Beijing Olympic Games and 2010 Shanghai World Exposition. Currently, CETC is actively involved in Milan World Expo and Brazilian Olympic security cooperation projects.

Public event security

CETC and Italy Finmeccanica Corporation reach agreement on together participating in the competitive bidding of Milan World Expo and Brazilian Olympic Games.

Safety in public places

CETC's provided sophisticated security solutions for a variety of large projects including UN's headquarter, London Subway, Charles De Gaulle Airport in France, Nuremberg train station in Germany, the World Cup soccer field in Germany, Highway No.1 in United States and so on.

CETC's public security products guarantee the normal operation of London Subway

In Europe, CETC tailor-made security equipments and monitoring solutions for Frankfurt Light Rail Station in Germany, which has been successfully applied to monitoring in 16 outdoor light rail stations.

In Africa, CETC customized security equipments and monitoring solutions for nearly 30 gas station of Total Corporation in Morocco.

Campus and school bus safety

CETC tailor-made video surveillance products and solutions for an international school in Malaysia, which realized day and night surveillance and remote-controlled monitoring management network for all campus branches.

CETC successfully tailor-made vehicle monitoring system for school bus in an American school for monitoring

"Chinese products enjoy a high reputation for being cost-effective, and more than that, CETC provides us a most suitable and high-end solution we've been looking for."

Maureen Khoo
Project Manager of the
International School of Malaysia

The video surveillance system manufactured by CETC provides guarantee for the safety in an international school of Malaysia

智

Intelligence

*INTELLIGENCE ORIGINATED FROM
KNOWLEDGE. СМЪ МЪНЪ (WORDBOOK)*

ECONOMY, TECHNOLOGY AND LIVELIHOOD

Human's history has witnessed how dreams had come true. From farming by the slash and burn method to the invention of steam engine, and even to space exploration, the progress of human society is astonishing. Nowadays, the modern information technology represented by Internet of things has become part of human's life. It brings digital, networking and intelligent revolution in areas of city resources, environment and people's livelihood. In brief, better city, better life.

CETC applies the innovative technology into economy construction, people's livelihood improvement and space exploration worldwide. We are devoted to raising the capability of global information technology, building smart city and environment-friendly community in an aim to broadly and deeply increase the efficiency of city management and operation, discover the potential of city bearing capability, improve service quality and create a life of intelligence, efficiency, order and harmony.

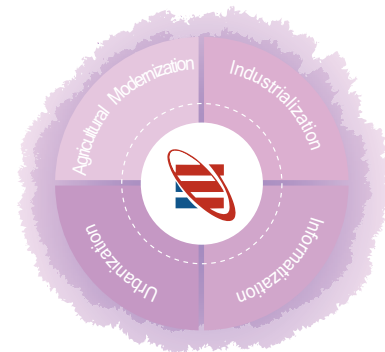

■ To help Sudan to establish think tank for electronics and Information technology

Sudan used to be weak in electronics and information industries. In order to improve the situation, CETC and Sudan cooperated to establish national institute for electronics and information R & D. The institute has cultivated thousands of qualified personals who have become backbone of Sudan's electronics and information industry.

Smart • Economy

As the national team of China's economy construction, CETC plays an important role in the industrialization, informatization, urbanization and agriculture modernization of China. We are willing to share our experience in industry upgrading and modernization with friendly countries worldwide. With the philosophy that it is better to teach one to fish, CETC is devoted to promoting the information system construction overseas.

■ To Help Developing Countries to Establish Manufacturing System for Electronics and Information Technology

CETC applies electronic information technology to developing countries. We have signed contracts with Pakistan and Myanmar for programs of national manufacturing system of electronic information technology, covering areas of electronics industry and information technology. These programs will help to build the manufacturing system from top level design to terminal products. It not only raises the capability of R&D, but also creates more employment opportunities and generate more taxes to benefit local economy.

On 17th, Dec, 2010, CETC and Pakistan signed the contract for National Electronics and Information Union program, witnessed by Chinese premier Wen Jiabao and Pakistan Premier Gilani.

Information Technology Applied in Agriculture

CETC has applied information technology into agriculture production to raise the efficiency of agriculture and farming industry. Through sharing the experience and technology with developing countries, we help these countries with agriculture modernization.

■ Myanmar agriculture integrated development program

CETC cooperated with Myanmar in agriculture integrated development which aims at increasing production, income and technological elements. Up to now, the first experimental plot has been successful.

President of Myanmar inspected CETC's demonstration garden of technological agriculture in Myanmar for 3 times

average yield per mu
compared with the past

■ Farm machine in aid of Mauritania

In 2012, CETC took an active part in the foreign assistance programs by Chinese government. Two batches of farming machines have been shipped to Mauritania. Meanwhile, we sent 5 engineers to provide technical training and service. This program greatly improved local agricultural production efficiency.

Chen Gonglai, Chinese Ambassador in Mauritania, exchanges certificates with Moktar, Minister of Agriculture Development

Engineers from CETC provide technical training in Mauritania

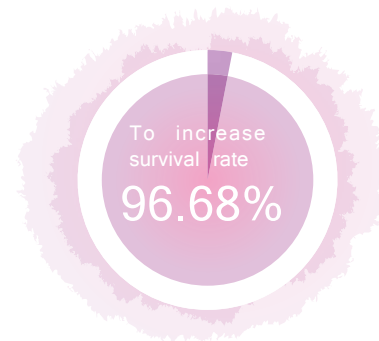

■ Modern breeding system raises the productivity

CETC provides high efficiency solution as well as related technical assistance of breeding industry for Russia, Philippines and Cuba. After the equipment in service, the survival rate of chicken has rose to 96.68%.

Photo of poultry farm in New Town of Russia

The equipment in service

To Construct Smart City Panorama

As a leader of electronics and information technology, CETC is devoted to helping our customers to raise the integrated management capability. With the capability of top level design and system integrated, CETC is qualified to provide customers with solutions for intelligent traffic, ATC, weather electronics, energy electronics, e-government, e-health care etc.

■ In Myanmar

CETC has established close cooperative relations with the ministries of Commerce, Posts and Telecom, Transport, Electric Power and Energy in Myanmar. CETC has signed cooperation agreements with Myanmar in areas of Posts and Telecom and New Energy, so as to upgrade relative industry.

■ In India

CETC provided overall security solution for ClaraSwain hospital in India, including safety guarantee to staff and patients.

CETC's products have been applied in more than 100 countries and regions worldwide.

Radio Astronomical Observatory in Australia

CETC takes the responsibility for science and engineering projects overseas. We have successfully designed and manufactured 36 antenna for ASKAP(Australian Square Kilometer Array Pathfinder). Meanwhile, CETC also provides solutions for research, technology upgrading, personnel training, manufacturing of typical equipment and operation & maintenance.

To express thanks to CETC, the 24th antenna was named Janimaarnu(a Chinese) by ASKAP

Naming Ceremony
Local Residents takes photos with the 24th antenna

Smart • Technology

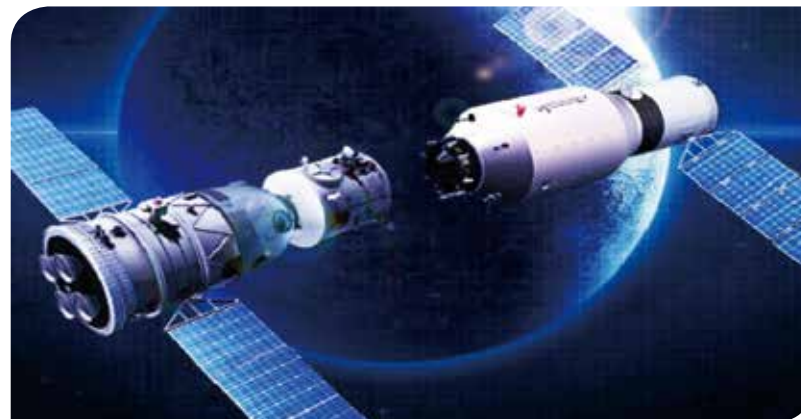

Technology is becoming a key element for the innovation of human life. It plays a crucial role for space extension and improvement of life quality. With strong R&D capability, CETC has made great contribution to space exploration, research in polar region and disaster relief.

Peaceful Space Exploration

Space rendezvous and docking

It has been a long history for human to explore the space. CETC is devoted to peaceful space exploration. With the advantage in areas of monitoring & surveillance, communication, radar detection and life-support systems, CETC has made great contribution to space exploration.

CETC plays a key role in space rendezvous and docking to probe the mysteries of the universe

Polar Observatories

As the team leader of the 3rd research group of International Telecommunications Union, CETC joined EISCAT on behalf of China. CETC shared ionospheric data with Russia, Australia, Japan and USA, and set up observatories with Finland, Norway, Singapore and Chile. By data required, CETC greatly promoted the development of radio wave propagation and research and provided guarantee for communication stability and disaster relief such as solar storm.

The communication system provided by CETC guarantees the stable operation of Kunlun station in South Pole.

Intelligent Disaster Prevention and Mitigation

CETC is devoted to raising the capability of disaster early warning and analysis. We focus on the R & D of products such as emergency communication and life detection etc. The application of our products in disaster relief of Chile Earthquake and Indonesian Tsunami won CETC solid reputation.

Beidou navigation

CETC is a solution provider for navigation & positioning system, electric power system, ground terminals, test and certification service of Beidou Navigation system. Beidou Navigation system plays an important role in world disaster prevention and relief as well as space exploration. At present, CETC has signed contract with Thailand. And we are negotiating with other countries in southeast Asia for the application of Beidou Navigation system.

1

2

3

4

- 1.CETC participated in UN disaster prevention and relief conference, and Beidou Navigation system is playing an active role in world disaster prevention and relief.
- 2.Beidou has become compatible with GPS system, which provide more guarantee for disaster prevention and relief
- 3.Beidou Navigation watch has become a compelling product
- 4.Beidou Navigation system plays an important role in disaster relief

Life detection

On 7th, April, 2012, Northern Pakistan suffered from an avalanche, in which more than 100 people were buried. CETC sent experts and engineers there with equipment such as radars for life detection and geologic detector etc.

CETC's experts and disaster relief team

Monitoring and prediction of ionosphere

The monitoring and prediction of ionosphere turbulence is of great value for earthquake prediction. With monitoring network covering South Pole, North Pole, equator and South China Sea, CETC makes the most use of national ionospheric wave monitoring work to share the data and analysis results with Department of Earthquake, and also with friendly countries.

CETC has established national data base for ionosphere and ground high-definition monitoring, which further strengthened the research and service for earthquake prediction and early warning.

绿

Green

LOVE ALL, FOR WE ARE ALL PART OF NATURE.

RESPONSIBILITY, ENVIRONMENT AND TECHNOLOGY

Energy saving, low carbon emission, environmental protection and sustainable development has become a trend worldwide. With the development concept of resource-saving and environment-friendly society, the Chinese government encourages green, cyclic and low-carbon development, which emphasizes the quality and efficiency of economic growth.

CETC strives to protect our globe and maintain low carbon economic development in overseas business. CETC has established new energy industry chain at various stages including research, manufacturing, test and certification and service. Meanwhile, through the establishment of management system for environmental protection, CETC brings objectives for environmental protection into the whole process of design, research, manufacturing, business operation, supply chain management, product application and recycle. Therefore, we are continuously devoted to the amelioration and innovation of energy efficiency improvement, emission reduction and resource conservation.

Green • Responsibility

CETC combines environmental protection into its development by establishing mature environment protection system, encouraging green industry development and promoting supply chain management. As a result, CETC insists on concepts of environment protection in every period of production cycle, reduces consumption of irreproducible resources, impels the environmental protection capability of enterprise and the whole industry, reduces pollution and provides green products to the world.

CETC pays great attention to environment protection requirement of products and producing process. By now we have been certified by CESA environment management system and career health safety management system, which proves CETC's environment protection system has been recognized by authorities.

Environment management system

CESA environment certificate and CESA health certificate

Green • Industry

CETC is willing to take the responsibility of leading the development of environment protection technology and products, which has become an important part of CETC's future development. To promote the sustainable development of economy, society and environment, CETC pays great attention to environment protection technology as well as clean and high efficiency products. We have gained much success in solar energy, green illuminating, energy-saving test and authentication. CETC is willing to contribute more effort for greener land, cleaner sky and clearer air.

Breakthrough of Solar
Energy producing
capability
1000 megawatt

Green Technology

In the area of solar energy production, CETC ranks top worldwide. As a member of Global environment protection organization, CETC owns all the producing equipment and products in the whole process of solar energy production. With creative technology, CETC aims to reduce the producing emission and encourage recyclable use of resources so that we can promote healthy and sustainable development of new energy industry. Besides, CETC's intelligent electricity network and energy-saving information system have achieved breakthrough in many projects, among which LED products and technology have reached international levels.

LED transforming

Green Products

To provide environment-friendly products

The furnace for silicon solar energy cells provided by CETC to IBM, has won us good reputation with solid performance.

Environment Protection Consulting Service

CETC takes on challenges of global climate change through providing environment protection consulting, test, and authentication.

Environment protection test

CETC has established test labs for harmful materials inspection, which provides test and authorization of the electronics products and children's toys, to make sure the products match international standard (RoHS and WEEE by EU). This can provide guidance for enterprises in the manufacturing process, provide customers with assistance to choose green products, and promote technical support to green industry.

CETC's Testing Laboratory for harmful substances

Environment authentication

CETC's management system center has provided authentication services for more than 800 customers worldwide.

Environment management certificates

Career health safety management certificate

CETC has provided environment authentication services for more than 800 customers home and abroad

800

Green Promotion

CETC advocates on the promotion of environment protection concept. We pay much attention to propaganda and consulting to related enterprises. As a result, many of the related enterprises have set up the data base for supply chain so that we can track the whole process of manufacturing to ensure it match environment protection standard. In the supply chain data base, we require declaration or report to show there is no harmful material such as lead, mercury, sexivalent chromium, and polybrominated biphenyls etc.

CETC implants concept of low carbon into enterprise culture. With concept of "Environment protection into details", CETC encourages electronic file instead of papers, water and electricity saving, battery reclaim etc in overseas agencies. Meanwhile, CETC is devoted to the environment protection in overseas markets by planting, concept promotion etc.

CETC employees engaged in local ecology protection

**HARMONY, REFERS TO MUTUAL
UNDERSTANDING AND COMPROMISE. SHUO
WEN JIE ZI(WORDBOOK).**

GLOBAL VILLAGE, COMMUNITY AND STAFF

China, with a splendid civilization of over 5000 years, upholds the idea of harmony between man and himself, man and nature, man and society. Holding the faith of open and common development, China links its “Chinese Dream” to the development of a harmonious world, which is to inherit the tradition and build a well-off society in an all-round way and at the same time to contribute to the building of a harmonious world. By following the strategic development from harmonious country to harmonious region and world, China has showed to the world a path of harmonious development of an ancient country.

With the concept of “people oriented”, CETC contributes to the common development of the world by integrating with local communities with an aim to build a society of integrity, fraternity and harmony. To share our “Chinese Dream” with the rest of the world and realize a “World Dream” of common development and prosperity, CETC actively promotes international cultural exchange by sharing the Chinese long-standing harmonious cultural essence and achievements of socialism with Chinese characteristics with the rest of the world.

Harmony • Global Village

Living on this unique planet and in the same global village, human beings share common interests and destiny. We should seek common ground while putting aside differences to build a world family of common prosperity. CETC advocates the faith of harmony with an aim to promote harmonious progress of different civilizations and build a world of common development.

Production and Publication of the Large-scale Documentary *Observing China*

CETC produced and published the large-scale documentary *Observing China*, which has been translated into English, French, Arabic, Spanish and other versions and broadcast in nine countries like Zimbabwe and Egypt. *Observing China* helps people of different races and colors understand and support each other beyond ideological prejudice.

Observing China shows the world the idea of harmonious development of China

"Through the precious and delicate photos, as well as interviews with internationally recognized economists and highly respectable business leaders, 'Observing China' provides global audience a unique view of the development of China."

Bill Einreinhofer
the famous American Director, Winner of
Emmy Awards twice

Publication of the book *Harmony*

CETC published the book *Harmony*, which has been issued home and abroad. The book elaborates the idea of "harmonious development and peaceful rise" with an aim to let the world know and understand the essence of Chinese harmony.

Harmony is the core value of Chinese foreign policy. The idea of building a harmonious society contributes to the friendly relationship of China with its 14 neighbouring countries, 12 of which have signed a border treaty of peace. Especially between China and Pakistan, harmony plays a very important role in showing the bilateral friendly relationship. The diplomatic relationship between China and Pakistan has been established for more than 60 years. Despite the unstable international situation, the friendship of the two countries is still vibrant, which proves the strong power of the idea of harmony."

Mushahid Hussain...
Chairman of Pakistan Institute of Pakistan-China
relationship

Setting Up a Fund for Cultural Exchange

CETC set up a fund for cultural exchange and has patronized creation and publication of artists in countries like Pakistan and Sri Lanka. We also held international seminars on Scientific Outlook on Development and the idea of harmony to spread the concepts like harmonious world, harmonious economic trade and Scientific Outlook on Development worldwide.

CETC held Gandhara Art Festival

CETC host "Love•Hope", the youth cultural exchange activity between China and Pakistan during 2010 Shanghai World Expo. 19 Pakistan young people were invited to come to China to know and enjoy Chinese history and culture and the achievements we gained after opening and reform, which laid a solid foundation of the mutual understanding and friendship between Chinese and Pakistan youth.

"Love•Hope" delegation of Chinese and Pakistan youth

Chinese and Pakistan youth made wishes of harmonious development on the "Wall of Friendship"

CETC donated relief supplies for the victims suffering from flood in Thailand

CETC successfully assisted many countries with delivering the relief supplies to disaster area during Wenchuan earthquake attended Wang Yi (seventh from right), Deputy Foreign Minister at that time, attended the delivery ceremony of relief supplies from Pakistan

Dedication to Poverty Alleviation and Education Aid

CETC believes that poverty and lack of a good education are the breeding ground for terrorism. In northern Pakistan, numerous houses, school buildings were destroyed due to the war. And CETC financially aid Pakistan with building a primary school and electronic information laboratory in Swat in Pakistan. In Angola, CETC is also active in education aid by frequently donating articles for daily use and study to the children.

Harmony • Community

Community is closely related to business development. Upholding the spirit of innovation, CETC adheres to the common development of business company and community in an aim to contribute to human health, poverty alleviation, improvement of people's livelihood and make more communities and people benefit from development so as to achieve common development, friendly cooperation and harmony with community.

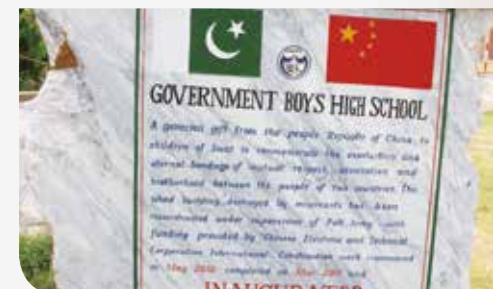

Caring and Rescue of the Victims in Disaster

CETC actively contributes to flood relief in Pakistan, Thailand, Myanmar, Angola and other countries by economic donation, saving the wounded and orphans and rebuilding the houses. Moreover, CETC zealously helped with the sending and delivery of relief supplies to send them to the victims as soon as possible with the superiority in international logistics and customs declaration.

Help Rebuild Houses

CETC was active in helping Sri Lanka with reconstruction after war by undertaking the projects of rebuilding hospitals and providing full ranges of medical equipments and staff training for more than 20 hospitals, which benefited thousands of people. To improve the living conditions in Colombo in Sri Lanka, CETC implemented "the beautification project of Colombo", the stage one alone of the housing project has provided 10,000 permanent houses as well as the design and construction of supporting facilities.

Improvement of People's Livelihood, Donation of Equipments

In the end of 2011, CETC undertook the government's foreign aid missions in Tonga. We donated full ranges of mechanical equipments for road maintenance to Tonga government including concrete mixers, vibratory rollers, wheel loader-diggers and so on, as well as dispatched technicians to provide technical services, which greatly improved the construction of local infrastructure.

CETC accomplished the mission and made great contribution to the road construction of Tonga, which promoted the economic and social development of Tonga and the bilateral friendship between the two countries."

Vaai Proulx
Vice Prime Minister of Tonga

As a state-owned enterprise, CETC acts as a paragon in the field of electronics by actively fulfilling the missions of foreign aid. Hope CETC will make more progress in every foreign aid program and make contributions to the development of Chinese foreign aid.

Wang Donghua
Chinese ambassador extraordinary and plenipotentiary to Tonga

Integration with Local Society, Building of a Harmonious Society Together

CETC strictly obeys local laws and regulations, respects customs overseas. We care for the vulnerable groups and help with community running to build a harmonious world together.

■ President of Syrian awarded employee of CETC a presidential medal

Mr. Xu Huixing, a representative from CETC's marketing agency in Syria, once came across a car crash when he was on a field mission. He had been seriously injured, but without too much thinking for himself, he immediately went to rescue Syrian employees and other injured persons. Owing to his noble act, the President of Syria awarded Mr. Xu Huixing the Syrian Order of Merit-Excellent Degree.

The awarded ceremony

Future Prospects

Standing at the new historical starting point, CETC will continue to enhance the core competitiveness and ability to fulfill responsibilities, promoting the transformation from the domestic enterprise to international enterprise, to civil enterprise which can integrate into the community, protecting the environment, taking into account workers, enterprises and stakeholders. With "Great Love" heart, we will spread the love and hope in the world wide, setting an example to the realization of the harmonious development of enterprise, environment and society.

Adhering to the "four integrations", establishing and improving management system and mechanism of social responsibility, by the means of strengthening the social responsibility training of overseas employees, issuing the "CETC Overseas Social Responsibility Action Guide," publishing handbooks of social responsibility, etc., to improve staff awareness and implementation capacity of social responsibility. By carrying out the case selection, appraising and choosing excellent work of social responsibility, etc., CETC has been carrying out all-round promotion of social responsibility work.

The innovative research and development of modern equipment and technology such as anti-terrorism, security of electronic and etc., creates the industrial community of C41, early warning, communications and other fields of collaborative development, strengthens the exchanges and cooperation in security products and technology to contribute to the international anti-terrorism so as to build a peaceful living environment for human beings.

Continue to carry forward the "harmonious world" concept, actively participate public welfare undertakings in order to promote employment, community building, donate to the education, poverty alleviation and help those in difficulty, cultural exchanges in various forms to promote the "people-oriented" concept of harmony.

Take advantage of our technological superiority to develop the green low-carbon innovative technology, popularizing the new energy and green environmental friendly products, helping improve the local environmental standards, realizing ecological civilization, and protecting the local environment, in order to contribute to protecting the global environment.
